

HB530: Health Occupations - Pharmacists - Administration of Vaccinations  
Jennifer Nichols

**Oppose**

I am a concerned parent strongly opposed to HB530 allowing pharmacists to administer vaccines to children.

Pharmacists don't know the complete health history of a consumer. I use that word because there is no relationship between the child and pharmacist. It seems clear this about money. Not all children are the same! This will harm the doctor/patient relationship. Please vote NO on this bill.

Thank you,
